## An Introduction to Amgen Research and Preclinical Development

---

Wednesday, May 25th, 2005

2:00 PM to 3:30 PM

CHS 63-105

With its headquarters in Thousand Oaks, CA, Amgen is a science-driven biotechnology company focused on developing therapeutics for human disease. We have invited Amgen representatives to talk to postdocs about working at Amgen and performing research in an industrial setting.

Amgen Scientists and Representatives from the following disciplines will attend:

- \* Inflammation Research
- \* Neuroscience Research
- \* Protein Science (develop protein tools and therapeutics)
- \* Pharmacokinetics and Drug Metabolism
- \* Pharmaceutics (formulation, delivery)
- \* Safety Assessment
- \* Human Resources and Corporate Communications

They will discuss the science of drug development from discovery research through human clinical trials and highlight skills required by scientists to participate in each department. They will also answer other questions about working in the biotechnology industry.

Everyone is invited! Please RSVP at [www.postdoc.ucla.edu](http://www.postdoc.ucla.edu)
